

## **New Version of Software by EasyFrom, Inc. Makes Database Conversion Simpler, Quicker**

*The latest version of ESF Database Convert software from database conversion technology company Easy From, Inc. boasts an improved conversion engine and faster processing speed. The newest software supports all the world's language characters and more than 256 conversion methods.*

(EasyFrom) April, 2008 – Database conversion technology company EasyFrom, Inc. recently released the latest version of their software – [ESF Database Convert version 5.8.08 for Windows](#). Released April 26, this edition software features an improved translation engine and higher operation speed.

Need to convert business information from an MS-Access to MySQL or MySQL to SQL Server? In just three simple steps, ESF Database Convert software provides more than 256 conversion methods to migrate data from one database format to another. The new, wizard-like database migration software is exceptionally high-speed and allows users to transfer table views, primary keys, indexes, foreign keys, auto-ID, and more.

In addition to converting between a multitude of database formats, the newest version EasyFrom, Inc. tool also supports MySQL, SQL Server, PostgreSQL, Oracle, InterBase, Access, Excel, Visual Foxpro, Paradox, Lotus, dBase, and ODBC. It also supports all of the world's language characters(UNICODE) and gives users the option to change table/field name, type, length, default value, and filter data.

Available for purchase for as low as \$159USD, the new ESF Database Convert software is available for download at the [EasyFrom, Inc. website](#).

In addition to the ESF Database Convert version 5.8.08 software, EasyFrom, Inc. also offers supplementary downloads. Users can find Microsoft MDAC 2.8, Oracle Instant Client, 2007 Office System Driver, SQL Server 2005 Native Client, and QLE DB Provider for Visual FoxPro at [www.easyfrom.net](http://www.easyfrom.net)
